Skills

JavaScript ES6, HTML, CSS3, SCSS, React, Gatsby.js, Git, RESTful API's, Cincom Socrates, Cincom Guru Management Studio, Adobe Photoshop, Adobe XD

Personal Projects

My Homepage & Portfolio

React, Gatsby.js, Styled-Components

Repo: <https://github.com/IAmJohnOConnell/weather-app>

Demo: jtocodes.com

- Showcase and documentation of my work, thought process and code.
- Uses Gatsby to dynamically generate pages for each portfolio project and blog post.
- Uses CSS Variables to efficiently style the entire site based on a custom theme.

Weather App

React, Styled-Components

Repo: <https://github.com/IAmJohnOConnell/weather-app>

Demo: <https://weatherapp-iamjoconnell.netlify.app>

- Fetches data from OpenWeatherAPI using Axios.
- Displays current weather and weekly forecast data for searched location

Pokedex V2

React, Styled-Components

Repo: <https://github.com/IAmJohnOConnell/pokedexv2>

Demo: <https://pokedexv2-iamjoconnell.netlify.app/>

- Uses Styled-Components to implement a Light / Dark theme toggle feature.
- Fetches Pokemon data from PokeAPI
- Detailed Pokemon Card for each Pokemon, custom made with CSS inspired by the Pokemon TCG Cards.

Work Experience

E-One, Remote — Configuration Analyst

August 2017 - Present

- Currently developing a product configurator for the company's first electric vehicle.
- Collaborate with Product Management and Stakeholders to modify our current sales application and develop new features.
- Reported, tracked, and resolved bugs, feature requests, and UI/UX improvements
- Designed and developed a product configurator application for several product lines, allowing the company to bring those new products to market.
- Migrated and refactored legacy code from depreciating systems into current production code base.

Th!nk Technologies, Ocala, FL — Web Developer

January 2016 - August 2017

- Maintained the company's existing website.
- Coded HTML newsletters for email marketing campaigns and distributed weekly updates and news through MailChimp.

Verizon, Ocala, FL — Solutions Specialist

August 2014 - February 2017

- Taught educational workshops on accessibility features and their importance to differently-abled customers. Resulting in an increase in store and personal sales.
- Created customer facing documentation outlining procedures and use cases for various products and services.
- Leveraged technical expertise to better assist customers and demonstrate product value through concise, easy to understand communication.
